

1. He needs to use 2 jugs of water, because $2 \times 500\text{ml} = 1 \text{ litre}$.

2. a) 550ml b) 0.55l

3. A sensible estimate, between 750ml and 950ml

4.

	grams	kilograms
potatoes	3500	3.5
apples	1200g	1.2
grapes	250	0.25kg
ginger	30g	0.03

5. C, A, B

6. Anya is incorrect. Half a kilogram = 500g, and the apples weigh 550g which is greater.
